Summary

Java Backend and Full Stack Engineer with 2+ years building REST APIs, Spring Boot microservices, and real-time systems for CRM, logistics, and SaaS products. Strong in **Java 17**, **Spring Boot**, **Spring Cloud**, **Hibernate**, **PostgreSQL**, **MySQL**, **MongoDB**, **Redis**, **AWS**, with production experience on **OpenShift** and **Jenkins CI/CD** and frontend delivery in **React** and **Next.js**. Test-driven with **JUnit**, **Mockito**, **Postman**; also experienced in **Go (Gin)** and **MERN**.

Core Skills

Languages: Java 17, JavaScript, TypeScript, SQL, Go (Golang), Python

Backend: Spring Boot, Spring Cloud, API Gateway, Spring Security, Spring Data JPA, Hibernate, Spring Batch, Spring AI, REST APIs, Microservices, WebSockets, JWT, Node.js, Express.js

Databases & Messaging: PostgreSQL, MySQL, MongoDB, Redis, Kafka, PostGIS

Testing & Tooling: JUnit 5, Mockito, Postman, Swagger / OpenAPI, Log4j, Maven, Gradle, Git

Cloud & DevOps: AWS (S3, EC2), OpenShift, Docker, Kubernetes, Jenkins, CI/CD, Linux

Frontend: React, Next.js, HTML, CSS, Tailwind CSS

Practices: Agile / Scrum, System Design, Low-Level Design, Distributed Systems, Caching, LLM Integration

Experience

Natlov Technologies Pvt Ltd

Jan 2026 – Present

Full Stack Developer (*Java 17, Spring Boot, Spring Cloud, Hibernate, PostgreSQL, MySQL, Next.js, OpenShift*)

- Built and maintained **Java 17 / Spring Boot** microservices behind a **Spring Cloud API Gateway**, with **Hibernate** on PostgreSQL and MySQL, **Swagger / OpenAPI** REST contracts, **Log4j** logging, and **Maven** builds in **Agile / Scrum** sprints.
- Designed a **concurrent-editing protection mechanism** (version-based optimistic locking with conflict detection at the database layer) for collaborative workflows, cutting conflicting updates by **80%** and preserving data integrity.
- Reduced average API response time by **40% (500 ms to 300 ms)** via **asynchronous processing**, **Spring Batch** jobs with scheduled triggers for large-volume report calculation, and **Hibernate** query and index tuning.
- Integrated **third-party vendor systems** over REST, handling authentication, request/response mapping, retries, and error handling to keep vendor workflows reliable.
- Automated **Jenkins CI/CD** pipelines deploying to **OpenShift**, halving deployment time from **20 min to 10 min**; wrote **JUnit 5 / Mockito** unit and integration tests, maintained **Postman** regression collections, and reviewed pull requests.

Railse

Nov 2024 – Dec 2025

Backend Engineer (*Java, Spring Boot, Hibernate, Gradle, PostgreSQL, MySQL, MongoDB, Redis, AWS, Jenkins*)

- Designed and scaled **RESTful microservices in Java / Spring Boot** with **Hibernate** (Gradle) for CRM and logistics workflows, owning inter-service communication and data consistency across **PostgreSQL, MySQL, and MongoDB**.
- Improved API latency by **30–40%** and cut database load by **~35%** through SQL query optimization, MongoDB indexing, and **Redis** caching.
- Built **real-time, event-driven features over WebSockets** for logistics conversations and live shipment updates.
- Developed chat-based logistics coordination with secure storage of bills and quotes on **AWS S3**; maintained **Jenkins** pipelines, **Log4j** logging, **JUnit / Mockito** tests, and **Postman** contract checks for each release.
- Mentored an **engineering intern**: onboarding, code reviews, and guided delivery in an **Agile** team (ClickUp).

Otusone LLP

Feb 2023 – Nov 2023

Engineering Intern (*MERN: MongoDB, Express.js, React, Node.js*)

- Built and optimized **Node.js / Express.js REST APIs** on **MongoDB** for order and product management, improving response time by **~30%**; cron-based notifications and email automation cut manual effort by **~40%**; built **React** components.

Projects

HireFlow – Talent Acquisition Platform *Spring Boot, Spring Cloud Gateway, PostgreSQL, MongoDB, Redis, Next.js*

- Multi-tenant recruitment platform built as Spring Boot microservices behind a **Spring Cloud API Gateway**; real-time video interviews over WebRTC and Razorpay payment integration; **JUnit / Mockito** tests and **Postman** collections.

Real-Time Chat Application

Spring Boot, Spring AI, WebSocket (STOMP), WebRTC, MongoDB, Next.js

- One-to-one and group messaging with delivery/read receipts, JWT-secured REST and WebSocket endpoints, audio/video calling, and **LLM-powered message suggestions**; live at chat-app-ui-rouge.vercel.app.

Online Food Ordering Platform

Java 17, Spring Boot 3, Spring Security, JWT, Hibernate, MySQL, React, Redux

- JWT-secured Spring Boot REST API with role-based routes and JPA / Hibernate on MySQL; **React** customer app and admin dashboard; live at foodiyapa.vercel.app.

Education & Certifications

Scaler Academy – Software Development & System Design

Nov 2023 – Nov 2024

Full-time program: Java, Spring Boot, SQL, Low-Level Design, Docker & Kubernetes; **600+ DSA problems** solved.

B.Tech, Electrical Engineering, Dr. A.P.J. Abdul Kalam Technical University, Lucknow

2016 – 2020

Career note: 2020 – 2022 preparing for national competitive examinations; moved into software engineering in 2023.
